SAFETY DATA SHEET
SUPADEC WHITE SPIRIT

SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1. Product identifier

Product name SUPADEC WHITE SPIRIT
REACH Registration number 01-2119458049-33-xxxx
REACH Registration notes The EC substance definition and related classification and labelling has been developed in the framework of the Regulation (EC) No 1906/2006 (REACH). For information about the related CAS number and more information on the substance naming see section 3 of this MSDS.
EC No. 919-446-0

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses SU 3 - INDUSTRIAL USES SU 21 - CONSUMER USES SU 22 - PROFESSIONAL USES PC9 - Coatings and Paints, Fillers, Putties, Thinners See front page of Annex for a full list of uses which are contained in the Exposure Scenario (ES)
Uses advised against Any other use than described above.

1.3. Details of the supplier of the safety data sheet

Supplier Bartoline limited
Barmston Close
Beverley
East Yorkshire
HU17 0LW
01482 678710
fax 01482 872606
HSE MANAGER
www.bartoline.co.uk

1.4. Emergency telephone number

01482 678727 0800-1700 Monday to Friday NHS Direct (General Public & Workers) 0845 4647
National Emergency Telephone Number
National Poisons Information Service (24hours) 0844 892 0111

SECTION 2: HAZARDS IDENTIFICATION

2.1. Classification of the substance or mixture

Classification (EC 1272/2008) Physical and Chemical Hazards Flam. Liq. 3 - H226
Human health EUH066;STOT SE 3 - H336;Asp. Tox. 1 - H304
Environment Aquatic Chronic 2 - H411
Classification (1999/45/EEC) Xn;R65; N;R51/53. R10, R66, R67.
The Full Text for all R-Phrases and Hazard Statements are Displayed in Section 16.

Human health
See section 11 for additional information on health hazards.

Environment
The product contains a substance which is hazardous to aquatic organisms and which may cause long term adverse effects in the aquatic environment. See section 12 as well.

Physical and Chemical Hazards
Vapours are heavier than air and may travel along the floor and in the bottom of containers. Closed containers can burst violently when heated, due to excess pressure build-up.

2.2. Label elements

EC No. 919-446-0
Contains Hydrocarbons, C9-C12, n-alkanes, isoalkanes, cyclics, aromatics (2-25%)
Label In Accordance With (EC) No. 1272/2008
SUPADEC WHITE SPIRIT

Signal Word
Danger

Hazard Statements
H226 Flammable liquid and vapour.
H304 May be fatal if swallowed and enters airways.
H336 May cause drowsiness or dizziness.
H411 Toxic to aquatic life with long lasting effects.

Precautionary Statements
P101 If medical advice is needed, have product container or label at hand.
P102 Keep out of reach of children.
P103 Read label before use.
P261 Avoid breathing vapours.
P262 Do not get in eyes, on skin, or on clothing.
P210 Keep away from heat/sparks/open flames/hot surfaces. - No smoking.
Wear nitrile/PVC protective gloves.
IF SWALLOWED: Immediately call a doctor/NHS direct.
Do NOT induce vomiting.
IF INHALED: Remove person to fresh air and keep comfortable for breathing.
Call a doctor/NHS direct if you feel unwell.
P303+352 IF ON SKIN: Wash with plenty of soap and water.
P403+233 Store in a well-ventilated place. Keep container tightly closed.
P405 Store locked up.
P501 Dispose of contents/container to hazardous waste collection point.

Supplemental label information
EUH066 Repeated exposure may cause skin dryness or cracking.
TO AVOID THE RISK OF SPILLAGE ALWAYS ENSURE THAT THE CAP IS SECURE AND THE CONTAINER IS HELD UPRIGHT DURING TRANSPORTATION AND STORAGE

2.3. Other hazards
Prolonged contact with the skin may cause irritation

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

3.2. Mixtures

The Full Text for all R-Phrases and Hazard Statements are Displayed in Section 16.

REACH Registration number
01-2119458049-33-xxxx

REACH Registration notes
The EC substance definition and related classification and labelling has been developed in the framework of the Regulation (EC) No 1906/2006 (REACH). For information about the related CAS number and more information on the substance naming see section 3 of this MSDS.

EC No.
919-446-0

**Ingredient notes**

Under REACH some substances were registered which did not previously have an EC number assigned, or for which a registrant did not indicate the existing assigned EC number. These substances may have been assigned a Provisional List number by ECHA’s IT systems or by ECHA’s Substance ID team. In time ECHA plans to verify the substance identification of these substances, and it is only when the substance identification has been verified that the provisional list number will be published in the EC inventory and become official.

**Composition Comments**

A complex and variable combination of paraffinic and aromatic hydrocarbons having a carbon number range predominantly of C9 to C12 and boiling in the range of approximately 135 to 220 degrees C. The aromatic content is between 2% and 25%.

---

**SECTION 4: FIRST AID MEASURES**

4.1. Description of first aid measures

**General information**

IN CASE OF SERIOUS OR PERSISTENT CONDITIONS, CALL A DOCTOR OR EMERGENCY MEDICAL CARE.

**Inhalation**

Move the exposed person to fresh air at once. Get medical attention. Provide rest, warmth and fresh air. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen.

**Ingestion**

DO NOT INDUCE VOMITING! NEVER MAKE AN UNCONSCIOUS PERSON VOMIT OR DRINK FLUIDS! If vomiting occurs, keep head low so that stomach content doesn’t get into the lungs. Get medical attention immediately! Provide rest, warmth and fresh air.

**Skin contact**

Remove contaminated clothing. Wash the skin immediately with soap and water. Get medical attention promptly if symptoms occur after washing.

**Eye contact**

Immediately flush with plenty of water for up to 15 minutes. Remove any contact lenses and open eyes wide apart. Get medical attention if any discomfort continues.

4.2. Most important symptoms and effects, both acute and delayed

**Inhalation**

Vapours inhaled in strong concentration have a narcotic effect on the central nervous system. Irritation of the respiratory tract due to excessive fume, causes headache, drowsiness or other effects to the central nervous system, loss of consciousness.

**Ingestion**

Nausea, vomiting, abdominal pain.

**Skin contact**

Prolonged or repeated contact may cause irritation and dry skin.

**Eye contact**

Burning feeling and temporary redness.

4.3. Indication of any immediate medical attention and special treatment needed

The most severe risk is through ingestion, the product may enter the lungs due to its low viscosity and lead to the rapid development of very serious inhalation pulmonary lesions (medical survey during 48 hours).

---

**SECTION 5: FIREFIGHTING MEASURES**

5.1. Extinguishing media

**Extinguishing media**

Fire can be extinguished using: Foam. Carbon dioxide (CO2). Water spray, fog or mist. Powder.

**Unsuitable extinguishing media**

Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture

**Hazardous combustion products**

Incomplete combustion and thermolysis may produce gases of varying toxicity such as carbon monoxide, carbon dioxide, various hydrocarbons, aldehydes and soot. These may be highly dangerous if inhaled in confined spaces or at high concentrations.

**Unusual Fire & Explosion Hazards**

May explode when heated or when exposed to flames or sparks. If heated, volume and pressure increases strongly, resulting in explosion of container.

**Specific hazards**

Vapours are heavier than air and may travel along the floor and in the bottom of containers. Vapours may be ignited by a spark, a hot surface or an ember.

5.3. Advice for firefighters
SUPADEC WHITE SPIRIT

Special Fire Fighting Procedures
Avoid breathing fire vapours. Cool containers exposed to flames with water until well after the fire is out. Keep run-off water out of sewers and water sources. Dike for water control. Containers close to fire should be removed or cooled with water.

Protective equipment for fire-fighters
Wear self-contained breathing apparatus and protective suit. In case of a large fire or in confined or poorly ventilated spaces, wear full fire retardant protective clothing and self contained breathing apparatus with a full face-piece operated in positive pressure mode.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures
Wear protective clothing as described in Section 8 of this safety data sheet.

6.2. Environmental precautions
Do not discharge into drains, water courses or onto the ground. Spillages or uncontrolled discharges into watercourses must be IMMEDIATELY alerted to the Environmental Agency or other appropriate regulatory body.

6.3. Methods and material for containment and cleaning up
Land Spill: Eliminate all ignition sources (no smoking, flares, sparks or flames in the immediate area). Stop leak if you can do so without risk. All equipment used when handling the product must be grounded. Do not touch or walk through spilled material. Prevent entry into waterways, sewers, basements or confined areas. A vapour-suppressing foam may be used to reduce vapour. Use clean non-sparking tools to collect absorbed material. Absorb or cover with dry earth, sand or other non-combustible material and transfer to containers. Water Spill: Stop leak if you can do so without risk. Eliminate sources of ignition. Warn or evacuate occupants in surrounding and downwind areas if required, due to the toxicity or flammability of the material. If the flashpoint exceeds the ambient air temperature by 10 degrees C or more, use containment booms and remove from the surface by skimming or with suitable absorbents. If the flashpoint does not exceed the ambient air temperature by at least 10 degrees C, use booms as a barrier to protect shorelines and allow material to evaporate. Seek the advice of a specialist before using dispersants.

6.4. Reference to other sections
Wear protective clothing as described in Section 8 of this safety data sheet. See section 11 for additional information on health hazards. For waste disposal, see section 13.

SECTION 7: HANDLING AND STORAGE

7.1. Precautions for safe handling
Avoid contact with skin and eyes. Keep away from heat, sparks and open flame. Eliminate all sources of ignition. Risk of vapour concentration on the floor and in low-lying areas. Static electricity and formation of sparks must be prevented. Use explosion proof electric equipment. Storage tanks and other containers must be grounded. Protect electric equipment against sparking in case of risk of explosion. Wear full protective clothing for prolonged exposure and/or high concentrations. Contaminated clothing and shoes must be discarded. Contaminated rags and cloths must be put in fireproof containers for disposal. Do not eat, drink or smoke when using the product. Ventilate well, avoid breathing vapours. Use approved respirator if air contamination is above accepted level.

7.2. Conditions for safe storage, including any incompatibilities
Store in tightly closed original container in a dry, cool and well-ventilated place. Keep in original container. Store in a cool and well-ventilated place. Take precautionary measures against static discharges. Flammable/combustible - Keep away from oxidisers, heat and flames. May attack some plastics, rubber and coatings.

Storage Class
Flammable liquid storage.

7.3. Specific end use(s)
The identified uses for this product are detailed in Section 1.2.

Usage Description
Keep containers closed when not in use. Open containers slowly in order to release any pressure build up that may occur. Keep out of reach of children. Apply "common sense" measures when using this product. When using transfer required amount to a non-plastic container such as glass or metal. Avoid all contact with skin and eyes. FOR FURTHER INFORMATION ON SPECIFIC END USE CONSULT ATTACHED EXPOSURE SCENARIO.

8.2. Exposure controls

Protective equipment

Engineering measures
Protective engineering solutions should be implemented and in use before Personal Protective Equipment (PPE) is considered. If enclosed handling cannot be guaranteed, ventilation and protective clothing must be used.

Respiratory equipment
For rescue and maintenance work in storage tanks use self-contained breathing apparatus. In an emergency or for exceptional short-lasting jobs in an atmosphere polluted by the product it is necessary to wear protective respiratory equipment fitted with a ABE1, ABE2 or ABEK1 gas filter.

Hand protection
Protective gloves must be used if there is a risk of direct contact or splash. The most suitable glove must be chosen in consultation with the gloves supplier, who can inform about the breakthrough time of the glove material. Use protective gloves made of: Nitrile.

Eye protection
Wear approved chemical safety goggles where eye exposure is reasonably probable.

Other protection
Wear appropriate clothing to prevent any possibility of liquid contact and repeated or prolonged vapour contact.

Hygiene measures
DO NOT SMOKE IN WORK AREA! Wash hands at the end of each work shift and before eating, smoking and using the toilet. Promptly remove any clothing that becomes contaminated. Wash promptly with soap & water if skin becomes contaminated. Use appropriate skin cream to prevent drying of skin. When using do not eat, drink or smoke.

**SECTION 10: STABILITY AND REACTIVITY**

**10.1. Reactivity**

No specific reactivity hazards associated with this product.

**10.2. Chemical stability**

Stable under normal temperature conditions and recommended use. Stable under the prescribed storage conditions.

**10.3. Possibility of hazardous reactions**

None under normal processing.

**Hazardous Polymerisation**

Not relevant

**10.4. Conditions to avoid**

Avoid heat, flames and other sources of ignition. Take precautionary measures against static discharge.

**10.5. Incompatible materials**

**Materials To Avoid**

Acids, oxidising.

**10.6. Hazardous decomposition products**

Incomplete combustion and thermolysis produces potentially toxic gases such as carbon monoxide, carbon dioxide, various hydrocarbons, aldehydes and soot.

**SECTION 11: TOXICOLOGICAL INFORMATION**

**11.1. Information on toxicological effects**

**Other Health Effects**

Harmful: if swallowed accidentally, the product may enter the lungs due to its low viscosity and lead to the rapid development of very serious pulmonary lesions (medical survey for 48 hours min).

**Acute toxicity:**
Acute Toxicity (Oral LD50)
> 15000 mg/kg Rat
OECD 401

Acute Toxicity (Dermal LD50)
> 3400 mg/kg Rat
24 hour

Acute Toxicity (Inhalation LC50)
> 13100 Rat 4 hours
data expressed as (vapour) in mg/m3 OECD 403

Respiratory or skin sensitisation:
Skin sensitisation
Not applicable.
Not Sensitising.

Germ cell mutagenicity:
Genotoxicity - In Vitro
Not applicable.
Negative.

Carcinogenicity:
Carcinogenicity
Not applicable.
This product is not classified carcinogenic.

Reproductive Toxicity:
Reproductive Toxicity - Fertility
No information available.
Results of guideline developmental toxicity studies on the substance and OECD developmental toxicity screening studies showed no evidence of developmental toxicity in rats.

Specific target organ toxicity - repeated exposure:
Target Organs
Central nervous system  Respiratory system,  lungs

Aspiration hazard:
Viscosity
Kinematic viscosity <= 20.5 mm2/s.

The fluid can enter the lungs and cause damage (chemical pneumonitis, potentially fatal).

Inhalation
Vapours inhaled in strong concentrations have a narcotic effect on the central nervous system. Irritation of the respiratory tract due to excessive fume. Causes headache, drowsiness or other effects to the central nervous system, loss of consciousness.

Ingestion
Symptoms: Nausea, vomiting, abdominal pain. Harmful: If swallowed accidentally, the product may enter the lungs due to its low viscosity and lead to the rapid development of very serious inhalation pulmonary lesions (medical survey during 48 hours).

Skin contact
Prolonged or repeated contact may dry skin and cause irritation. Frequent or prolonged skin contact destroys the lipacid cutaneous layer and may cause dermatitis.

Eye contact
Burning feeling and temporary redness.
Target Organs
Skin  Eyes  Respiratory system,  lungs

OCDE 211
12.2. Persistence and degradability

Degradability
Readily biodegradable

Biodegradation
Degradation (75%) ~ 28 days
OECD 301F
The substance is readily biodegradable.

Ecological information on ingredients.

Hydrocarbons, C9-C12, n-alkanes, isoalkanes, cyclics, aromatics (2-25%)

Degradability
Readily Biodegradable OECD 301F 80% after 28 days

12.3. Bioaccumulative potential

Bioaccumulative potential
Measured experimental data on hydrocarbons UVCB substances are not meaningful, since each component of the constituents is likely to behave differently.

12.4. Mobility in soil

Mobility:
Substance is a UVCB. Standard tests for this endpoint are not appropriate.

12.5. Results of PBT and vPvB assessment

Not Classified as PBT/vPvB by current EU criteria.

12.6. Other adverse effects

Not available.

SECTION 13: DISPOSAL CONSIDERATIONS

General information
Waste is classified as hazardous waste. Disposal to licensed waste disposal site in accordance with the local Waste Disposal Authority. Waste is suitable for incineration. Rags and the like, moistened with flammable liquids, must be discarded into designated fireproof bucket. Where possible packaging should be collected for reuse or recycling.

13.1. Waste treatment methods

Empty containers must not be burned because of explosion hazard. Recover and reclaim or recycle, if practical. Liquid components can be disposed of by incineration. Waste material is classified as hazardous waste and should be disposed of by incineration or collected by a registered waste disposal company, operating within the scope of the Hazardous waste Regulations 2005 in the UK or local equivalent regulations in other countries.

Waste Class
When this product, in its liquid state, as supplied becomes waste it should be disposed of as hazardous waste using the waste code 08 01 11 waste paint and varnish containing organic solvents or other dangerous substances. Empty used containers should be disposed of as waste code 15 01 10 packaging containing residues of or contaminated by dangerous substances. When used the removed sludge should be disposed of using waste code 08 01 13 sludges from paint and varnish remover containing organic solvents or other dangerous substances. Any absorbents used for clearing up spills should be disposed of using waste code 15 02 02 absorbents contaminated by dangerous substances.

SECTION 14: TRANSPORT INFORMATION

Road Transport Notes Limited quantity size 5 litres (LQ 7) Excepted Quantity size 30ml (E1)

EU Legislation

National Regulations

Users of this product are reminded of their duties under the current Control of Substances Hazardous to Health Regulations and a suitable and sufficient assessment of all the risk should be undertaken before using this product. The guidelines given in the HSE publication COSHH ESSENTIALS - Easy Steps To Control Chemicals gives sound advice for deciding safe working control measures.

Authorisations (Title VII Regulation 1907/2006)

No specific authorisations are noted for this product.

Restrictions (Title VIII Regulation 1907/2006)

No specific restrictions of use are noted for this product.

15.2. Chemical Safety Assessment

A chemical safety assessment has been carried out.

SECTION 16: OTHER INFORMATION

General information

The European Inventory of Existing Commercial Substances (EINECS) descriptions and numbers have been used historically to identify chemical substances. EINECS descriptions exist for a number of hydrocarbon substances derived from petroleum refining and chemical conversion. In the past this substances was identified by CAS 64742-82-1 but this description was overly broad as solvents have narrower hydrocarbon ranges, different classifications and different processing. A more focused and narrow definition was therefore required. REACH requires a clear and logical substance description and substance identification is a key component in registration. In order to facilitate appropriate registration of hydrocarbon solvents the Hydrocarbon Solvents Producers Association (HSPA) has conducted an in-depth assessment of hydrocarbon solvents in order to better characterize its substances and adopt a consistent substance identification system. This means that although the product has not changed (just how is described) there may be some difference as to what is displayed on the product labels as they were compiled using the old system.

Safety Data Sheet Status

Approved.

Risk Phrases In Full

R10 Flammable.

R65 Harmful: may cause lung damage if swallowed.

R66 Repeated exposure may cause skin dryness or cracking.

R51/53 Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

R67 Vapours may cause drowsiness and dizziness.

Hazard Statements In Full

H226 Flammable liquid and vapour.

H304 May be fatal if swallowed and enters airways.

H336 May cause drowsiness or dizziness.

EUH066 Repeated exposure may cause skin dryness or cracking.

H411 Toxic to aquatic life with long lasting effects.

Disclaimer

The information contained in this data sheet is provided in accordance with the requirements of the Regulation (EC) No 1907/2006 (REACH) and Regulation (EC) No 1272/2008 (CLP). The product should not be used for purposes other than those shown in Section 1.2. As the specific conditions of use are outside the suppliers control, the user is responsible for ensuring that the requirements of relevant legislation are complied with. The information contained in this safety data sheet is based on the present knowledge and the current EC and UK Legislation. It provides guidance on health, safety and environmental aspects of the product and should not be taken as a product specification.
